# Studio Cuts™

Partnership Program for Makers & Designers

---

**SPECIES**

Kerala Teak

**ORIGIN**

Southern India

**SERVICE**

Custom Milled

# What is Studio Cuts™?

---

Studio Cuts is our partnership program for makers, designers, and craftspeople creating work worth telling the world about. We source, mill, and deliver premium Kerala teak—custom to your specification—so you focus on making beautiful things.

## HOW IT WORKS

---

### 01 Brief

Share your project scope, cutting list, or material vision. A 25-chair run. A bespoke installation. A prototype for something new.

### 02 Curation

We hand-select and mill timber to your specification. You approve the grain character and colour before fabrication begins. Quality is decided at source.

### 03 Preparation

Kiln-dried to exact moisture content, precision-milled, packaged in branded wrapping. Everything arrives ready—no re-drying, no surprises.

### 04 Delivery

White-glove delivery to your workshop. Full documentation: UKTR certified, CITES compliant, chain of custody complete. UK support included.

### 05 Story

You make something beautiful. We help you tell the world it's made with Grainarch teak. Your credit is our credit.

## WHY STUDIO CUTS™

---

- **Zero Minimums**

One prototype chair. One bespoke panel. One run of 25. We work at your scale, not ours.

- **Specification-Ready**

Custom milled to your exact dimensions. No standardised widths, no waste. Ready to fabricate the moment it arrives.

- **Full Provenance**

Every consignment: UKTR documented, CITES compliant, ISPM-15 certified, complete chain of custody. No questions. No surprises.

- **Curated Selection**

Hand-inspected grain and character. You approve the material before we mill. That ownership matters.

- **Partnership, Not Transaction**

We want your work to succeed. Your success is our success. We invest in the relationship, not just the sale.

# Material Specification

## SPECIES ONE

## Kerala Teak

Tectona Grandis

## TECHNICAL DATA

BOTANICAL NAME	Tectona Grandis
ORIGIN	Southern Kerala — Government forest divisions
DENSITY	650–750 kg/m <sup>3</sup> (air dry)
